**YOUR WATER SUPPLY SIR...**

He's just bought himself a Sumo Pump and can look forward to a trouble-free water-supply for the rest of his life. This is the

Sumo Type B. It's simple to install, will pump from any depth up to 200 feet and runs from a single phase domestic supply. The pump is unlikely to need attention more than once in three years, and there are no suction difficulties since it is already under water.

*A Sumo is a multistage centrifugal pump built as a single unit with a motor that has been specially designed to run under water. The whole unit is simply screwed onto the bottom of its own pipe and lowered into the well. Have a word with ...*

SPECIAL PARTS FOR ALL KINDS OF MACHINES

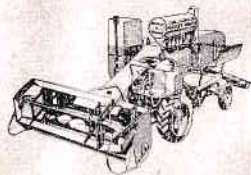

*Can you harvest laid crops?...*

*you care with the* **M-H 726**

In difficult conditions, this perfectly balanced self-propelled combine really comes into its own. No opening out is needed—you go straight into the crop without loss of grain, cutting in any direction. With a full view of the cutter-bar, you can quickly adjust table height and machine speed to suit varying conditions. The 726 has been an outstanding success on medium and large farms, producing heavier yields of clean grain in a wide range of crops. Special attachments are available to ensure maximum yields in all crops and conditions.

*The Massey-Harris 726—still the cheapest self-propelled—is backed by an effective service and spares organisation. Available with 40 bushel grain tank or 4 spout bagger, it has a full 8½ ft. cut, but will pass through a 10 ft. gateway.*
