INFERTILITY PROBLEMS CAUSED BY BLOOD UREA NITROGEN (BUN)

Intensive Irish dairy farmers are achieving high stocking rates by applying maximum levels of fertiliser, the practice produces very lush Nitrogen-rich grass in April-June period. This is also the peak mating season on most Irish dairy farms.

Nitrogen-rich grass gives rise to excessively high ammonia levels in the rumen. This ammonia is released in the bloodstream and converted into urea in the liver. There is now very strong evidence to suggest that the high blood urea nitrogen (BUN) level has a negative effect on:

- Conception rates (High levels of repeats)
- Cows coming on heat (interval between calving and 1st service increased)
- Milk protein.

SOUTHERN MILLING Ltd.
Has a proven dairy feed on the market.

SuperGraze

ALSO INCLUDES BIOPLUS, WHICH COMPRISES OF:

1. LEVUCCELL Yeast, which increases milk production.
2. B-Vitamins, which assist the breakdown of protein in nitrogen rich grass, and increased milk protein.
3. Protected Methionine and Lysine, which are 100% undegradable and bypass the rumen, and has a positive response in milk production.

SuperGraze the only product on the Irish market that offers you, Micro-Aid and BioPlus.

AMMERSHAM HEALTH

*Continuing our long stand commitment to local community by
supporting the Midleton Agricultural Show*

Amersham Health (Formally Nycomed Ireland) was established in Carrigtohill in 1993 and is part of the Amersham Plc Group, the world leader in diagnostic imaging agents used in X-ray, Magnetic Resonance Imaging, and Nuclear Imaging medicine.

Amersham Health manufactures the full range of non-ionic, X-ray, MRI and contrast media for the worldwide market. These products are made to improve the quality of X-ray and magnetic resonance images, thereby providing more accurate diagnosis, for example in the case of blocked arteries, tumours, and other soft tissue diseases.

Due to a reorganisation of worldwide manufacturing, Amersham Health is currently undergoing a major expansion programme which will see the Irish facility supplying products from Carrigtohill to the USA as well as wider world markets. This expansion is nearing completion.
